

2017 Innovation Challenge: Patient-Centered Measurement

Innovation Challenge Submission

NQF is committed through its [Measure Incubator™](#) to foster learning and improvement in the measure development process. Recently, NQF relaunched its Learning Collaborative, with the 2017-2018 Learning Collaborative Patient-Centered Measurement Webinar Series. As part of this series, NQF is holding its 2017 Innovation Challenge focused on patient-centered healthcare measurement.

We are soliciting submissions that present measure development, implementation, and/or reporting/benchmarking approaches focused on one or more [Principles for Making Health Care Measurement Patient-Centered](#). This framework was developed with broad stakeholder input and leadership from American Institutes for Research (AIR).

Innovation Challenge winners will receive a cash prize and a national platform to share their ideas through the Learning Collaborative. Please note that we are not soliciting formal proposals for measurement work facilitated through the Measure Incubator™.

Innovation Challenge submissions are due by 5pm ET on Wednesday, November 15, 2017 .

Please send your questions about the Innovation Challenge to incubator@qualityforum.org. We look forward to receiving your innovative ideas!

Before you begin, we recommend reviewing a sample submission form (PDF) for the information you will need to complete your submission. Please have all of the required information available before completing the online submission.

2017 Innovation Challenge: Patient-Centered Measurement

2017 Innovation Challenge Evaluation Criteria

Submissions should respond to each of the individual questions asked. Priority will be given to submissions that:

Describe an approach that would contribute significantly to patient-centered measurement by:

- o Enabling meaningful patient engagement throughout measure development, implementation, and/or reporting/benchmarking
- o Capturing a broad range of patient and/or caregiver perspectives
- o Providing innovative solutions and streamlined approaches to obtaining patient guidance on measurement

Are broadly applicable across different patient populations, healthcare settings and/or measurement gap areas

Represent novel approaches or new applications of existing solutions—from within or outside of healthcare

- o If theoretical, the submission should describe how the idea improves upon existing approaches in healthcare performance measurement or has been applied successfully in other industries

Have demonstrated success

- o If theoretical, the submission should explain how the idea could be implemented successfully and how success would be measured

Can be replicated by others

- o If theoretical, the submission should illustrate how the idea could be widely implemented

<input type="text"/>

3. Are you you an NQF member?

- Yes
- No

2017 Innovation Challenge: Patient-Centered Measurement

Submission Details

* 1. Which of the [Principles for Making Health Care Measurement Patient-Centered](#) does your submission address? (select all that apply)

- Patient-Driven
- Holistic
- Transparent
- Comprehensible and Timely
- Co-Created

* 2. Which stakeholder group(s) does your submission engage? (select all that apply)

- Caregivers
- Community-Based Organizations
- Health IT Vendors
- Health Policymakers
- Healthcare Providers
- Insurers
- Measure Developers
- Patients
- Patient Advocates
- Professional Societies
- Quality Improvement/Benchmarking Vendors
- Researchers
- Other (please specify)

* 3. Which phase(s) of performance measurement does your submission address? (select all that apply)

Measure Conceptualization

Measure Development

Measure Testing/Validation

Measure Implementation

Reporting/Benchmarking

2017 Innovation Challenge: Patient-Centered Measurement

Submission Details

Please answer each question in 500 words or fewer.

- * 1. Briefly describe the patient-centered measurement challenge you are trying to solve and how it affects patients and caregivers. Please note any collaboration with patients and caregivers in identifying this challenge.

- * 2. What type of work is required to implement your idea? Please describe how patients and caregivers would be engaged in this work. (Include level of effort or a description of the scope of work)

- * 3. Can this work be replicated by others? And, if so, how?

- * 4. Describe how your idea incorporates patient and caregiver priorities. Please note any collaboration with patients and caregivers in shaping your idea.

5. (Optional) If desired, you may upload a completed submission with figures, tables, graphics, or supplemental material
